

Fun with Numbers

Goofi Series: Fun with numbers

For Parents and Teacher

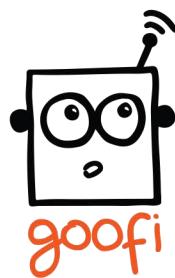

Children are natural artists. They learn to draw first, before learning anything. This new technique of learning numbers uses children's natural talent of drawing. Through this technique, children learn the numbers with fun and faster than ever. Less than 80% adult supervision is required compared to the typical alphabet learning strategy in schools and home.

How to use the book?

Both parents and teachers can print out individual pages and then give to the child. After the child learn how to draw a certain animal or object from a number, you can encourage them to try to make new things. For example, children draw a 'flower' from number '3'. Can they try to draw a rabbit from number '3'? The objective of the book is not just to teach alphabets but also encourage children to think creatively and differently.

Goofi Series: Fun with numbers

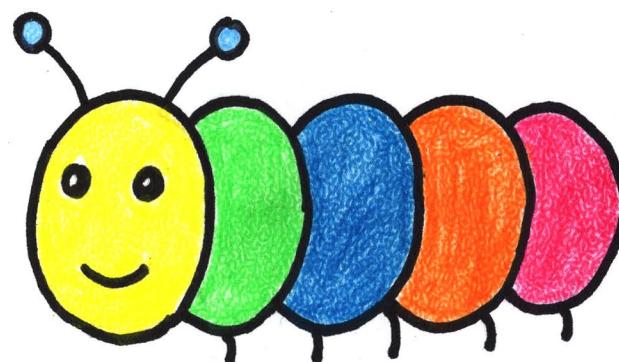

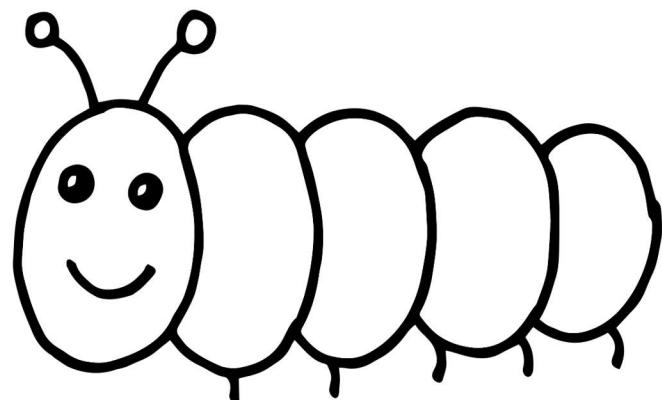

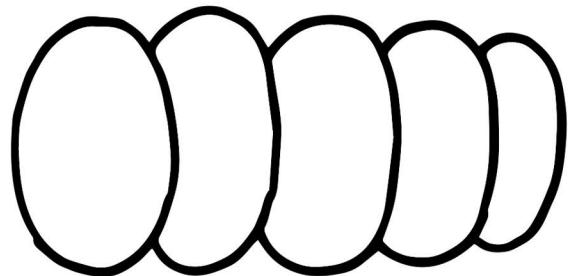

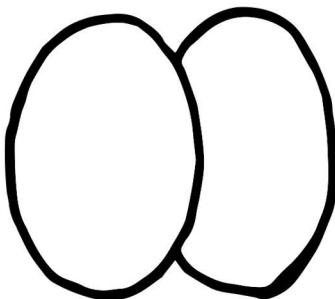

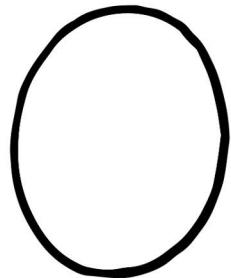

About the Content

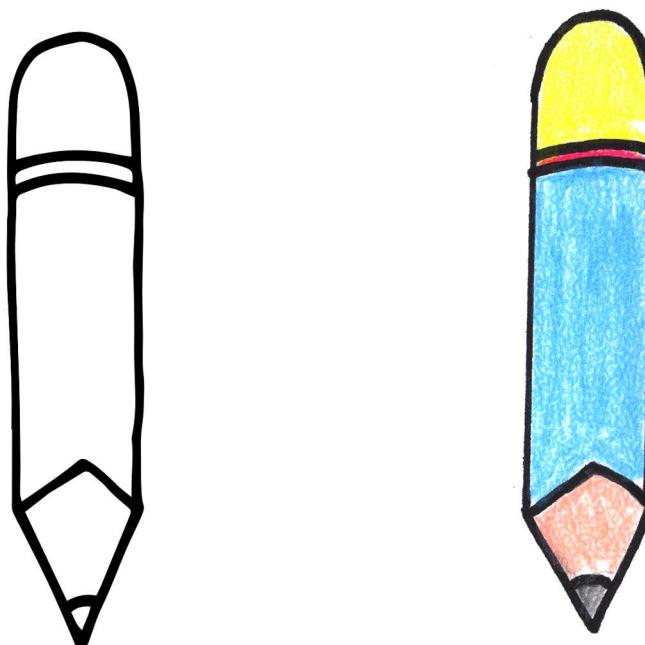

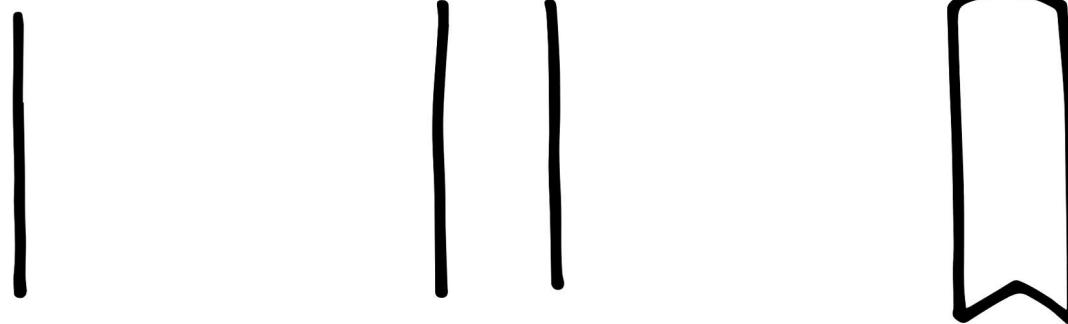

Children have natural talent to draw. Goofi's fun with number series is an innovative series that uses children's natural talent of drawing to teach numbers. The unique approach proves that children can learn numbers with almost no supervision from adults and also at a faster pace. Children, parents and teachers love working together with the series and have lots of fun. It's also a wonderful tool for children with learning disability. The series helps children not only to learn just alphabets but also improves their creativity, imagination and problem solving skills.
